

# MAKING THE FUTURE OUR PRIORITY

Hyder has a wealth of experience in providing sustainable and holistic management for all facets of the water environment. We are framework consultants to the Environment Agency, Homes and Communities Agency and local authorities for the following services.

**Development services:**

Flood risk assessment, drainage design, SUDS and infrastructure.

**Planning services:**

Strategic and preliminary FRAs, surface water management planning and water cycle studies.

**Flood management:**

River, coastal, surface and groundwater flood modelling and mapping.

**Water resources:**

Hydrometry, surface and groundwater sources, drought and abstraction control.

We believe that understanding and responding to what's important is key to delivering sustainable and commercial advantages to our clients, their stakeholders and the communities they serve.
