

Farmoor Reservoir

## Personal, trusted advice

Peter Brett Associates LLP is an independent sustainable engineering, land development and environmental services consultant, delivering technical excellence and personal, trusted advice to clients in the UK and beyond.

Our water management team works within a variety of market sectors and shares a background in flood and coastal protection, water supply, reservoir design and inspection, meteorology and sustainable design. We are engineers, hydrologists, hydrogeologists, hydraulic modellers and specialists in ecology, climate change and Environmental Impact Assessments.

We believe in a collaborative approach to the development of practical solutions, founded on proven expertise and informed market and regulatory insight.

Experience, research and personal relationships are highly valued by our consultants, as these inform a deep understanding of our clients' needs and commercial drivers.

We shape our clients' strategies and development tactics through intuitive pragmatism, technical leadership and professional opinion to unlock value and generate new opportunities.
