

*A Specialist Consultancy
providing analytical, modelling and software
development skills.*

Water Resource Associates Ltd [WRA] was formed in 1994 and provides specialist consultancy services, world-wide. The directors have previously worked for a range of organisations including the Centre for Ecology & Hydrology, the British Geological Survey, firms of consulting engineers, the Water Industry and International agencies. They have experience of working in the water environment in over 120 countries, across the full spectrum of arid to humid environments.

WRA has developed a range of specialised hydrological and water resource software:

HYSIM Hydrological simulation package
AQUATOR Water resource system simulation
INCA Integrated water quality modelling suite
WDT Well design tool kit
DISPRIN River water quality dispersion model
HYDRO Multi-purpose reservoir operation
CDIG Digitising software for hydrological data

WRA clients include the European Union, French Government, water companies, The Environment Agency, English Heritage, IUCN, WWF, SNIFFER, CEH, HR Wallingford, British Waterways, BP Exploration, Siemens, international consulting engineering firms, industrial, land & property developers, the tourism industry, private estates and universities.
