

Water Resources Specialist (Hydrology)

ASM306TL

Location – Milton, Cambridge

Salary up to £28,000 + benefits, depending on qualifications/experience

Closing Date 20 February 2012

Responsibilities

An exciting opportunity to join our industry leading Water Resources Management Team based in Milton House, Cambridge. Reporting to the Hydrology Manager, your role will be to provide professional water resources modelling and hydrology services.

You will be responsible for strategic modelling, developing and maintaining our models of the water supply system, as well as drought management and the development of water resource plans. You will also have accountability for providing specialist hydrological advice to internal and external customers regarding water resource matters. Assessing the impact of climate change and the inclusion of water quality risk information in Drinking Water Safety Plans will also be important elements in this challenging, yet very rewarding role.

What we are looking for?

You will be of graduate calibre within a relevant subject area and ideally have some experience in water resources specialist or hydrology. Alongside this you will also ideally have some experience in using packages for modelling rainfall-runoff and water resources systems. Strong IT skills and excellent organisational skills will be equally as important in this role.

What can we offer you?

As one of the largest Water Services Groups in the UK, we are continuously evolving in the way we work, improving ourselves as well as investing in our people. With this in mind we can offer significant career development and training to ensure that we bring our people with us and to offer varied opportunities throughout the organisation.
