

**British Hydrological Society
Eleventh National Symposium**

HYDROLOGY FOR A CHANGING WORLD

9-11 July 2012

Papers are listed in alphabetical order of first author: file names in red

Stephen Addy, Sohan Ghimire and Susan Cooksley
Assessing the multiple benefits of river restoration: the Logie Burn meander reconnection project
Addy_01

Susana L. Almeida, Nataliya Bulygina, Neil McIntyre, Thorsten Wagener and Wouter Buytaert
Predicting flows in ungauged catchments using correlated information sources
Almeida_02

Caroline Anderton, Thomas Crow, George Heritage, Louise Bond, Emile Wadsworth, Shona McConnell, Eilidh Wilson and Maida Ballarini
Achieving multiple benefits through river basin planning in the Forth Sub Basin district
Anderton_03

N.A.L. Archer, M. Bonell, N. Coles, A.M. MacDonald, R. Stevenson and P. Hallett
The relationship of forest and improved grassland to soil water storage and its implication on Natural Flood Management in the Scottish Borders
Archer_04

C. Bakopoulou, N. Bulygina, A.P. Butler and N.R. McIntyre
Sensitivity analysis and parameter identifiability of the land surface model JULES at the point scale in permeable catchments
Bakopoulou_05

Tom Ball, Andrew R. Black and Alan M. Macdonald
20 year records of spring flows in the Pentland Hills, Midlothian: geological controls and response to drought
Ball_06

Nicholas John Barber and Paul Francis Quinn
Catchment-scale management of farm runoff and the multiple benefits it can achieve
Barber_07

M.Z. Bieroza and A.L. Heathwaite
In-stream nutrient dynamics observed by automated high-frequency monitoring (River Leith, Cumbria, UK)
Bieroza_08

Christian Birkel, Chris Soulsby and Doerthe Tetzlaff
Estimating environmental flow regimes in regulated catchments
[Birkel_09](#)

R. Capell, D. Tetzlaff, R. Essery and C. Soulsby, C
Climate change impacts on catchment hydrology – a tracer-aided model approach
[Capell_10](#)

Stewart Child
Hydrometry in 2012 and beyond – thoughts and reflections of a mature hydrologist
[Child_11](#)

Jessica Davies, Keith Beven, Lars Nyberg and Allan Rodhe
Application of the Multiple Interacting Pathways model to environmental tracing data for a small till catchment
[Davies_12](#)

Julian J.C. Dawson, Lisa M. Avery, Nikki J. Baggaley, Pat Cooper, Helen F. Kemp, Wolfram Meier-Augenstein, Mark J. Brewer, Danny Frew and Sarah M. Dunn
A National Waters Inventory for Scotland: new approaches to monitor water quality
[Dawson_13](#)

Martin Dibley, Stewart Child, Richard Iredale and Alice Wiggins
Fish and flow – Maintaining the balance between hydrometric uncertainty and aids to fish passage at flow gauging structures
[Dibley_14](#)

Nikki Dodd, Sarah M Dunn, Andrew J Baird and John Wainwright
Ecohydrological patterns and vegetation management practices: importance for whole-hillslope hydrological behaviour: Examples from northern temperate hillslopes
[Dodd_15](#)

Juan Duan, Neil McIntyre, Christian and Onof
Resolving non-stationarity in statistical downscaling of precipitation under climate change scenarios
[Duan_16](#)

Sarah M Dunn, Marie Castellazzi, Maria Shahgedanova, Leah Jackson-Blake, Iain Brown, James Sample and Rachel C Helliwell
Modelling scenarios of land use and climate change on diffuse pollution from agricultural nitrate
[Dunn_17](#)

David Evans
The changing hydrology of agriculture
or
Can we grow enough food in tomorrow's climate?
[Evans_18](#)

C.L. Fyffe, B.W. Brock, M.P. Kirkbride, D.W.F. Mair and F. Diotri
The hydrology of a debris-covered glacier, the Miage Glacier, Italy
[Fyffe_19](#)

Grace Garner, David M. Hannah, Iain A. Malcolm and Jonathan P. Sadler
Inter-annual variability in spring- summer stream water temperature, microclimate and heat exchanges: a comparison of forest and moorland environments

[Garner_20](#)

Sohan Ghimire
Application of a 2D hydrodynamic model for floodplain mapping

[Ghimire_21](#)

C. Gibbins, I.A. Malcolm, R.J. Fryer, J. Keay, D. Tetzlaff and C. Soulsby
The influence of forestry on stream chemical and ecological recovery from acidification: insights from long term monitoring in Scottish catchments

[Gibbins_22](#)

R.D.Gosling, M.Zaidman, M. Wann and P.J.Rodgers
How low can you go? Using drought indices to protect environmental flows in Scottish rivers

[Gosling_23](#)

Karin Grust and Dave Stewart
Trial of the OTT Pluvio², an automatic weighing raingauge, in the UK

[Grust_24](#)

D.A.Hughes and T.Mohobane
Reducing uncertainty in hydrological models using local observed data: examples from South Africa

[Hughes_25](#)

Oana Iacob, John Rowan, Iain Brown and Chris Ellis
Natural flood management as a climate change adaptation option assessed using an ecosystem services approach

[Iacob_26](#)

J.P. Isaacs, R.E. Falconer, D.J. Gilmour and D.J. Blackwood
Dynamic visualisation and modelling to support sustainable phosphate management

[Isaacs_27](#)

M.P. Kennedy, K.J. Murphy, C. Soulsby, S. Lowe and C. Gibbins
Multiple-scale controls on physical and chemical habitat conditions and their influence on biotic assemblages in Zambian rivers

[Kennedy_28](#)

T.R. Kjeldsen, C. Svensson and J.M. Miller
Large-scale attribution of trend in UK flood flow data

[Kjeldsen_29](#)

A.M. MacDonald, A.G. Hughes, C.A. Auton, D.J. Lapworth, M.M. Mansour, T. Vounaki, A. Finlayson and M.T. Graham
Groundwater, flooding and superficial deposits in the Findhorn catchment

[MacDonald_30](#)

Charles E. L. Malcolm, Andrew R. Young, Ellen R. Willmott, Matthew G.R. Holmes and Richard D. Gosling

Can we give up gauging? A comparison of statistical certainty of gauged and modelled flows

[Malcolm_31](#)

Terry Marsh and Harry Dixon

The UK water balance – how much has it changed in a warming world?

[Marsh_32](#)

Richard Maxey, Michael Cranston, Amy Tavendale and Peter Buchanan

The use of deterministic and probabilistic forecasting in countrywide flood guidance in Scotland

[Maxey_33](#)

Lindsey McEwen, Franz Krause, Joanne Garde Hansen and Owain Jones

Flood histories, flood memories and informal flood knowledge in the development of community resilience to future flood risk

[McEwen_34](#)

Neil McIntyre, Caroline Ballard, Michael Bruen, Nataliya Bulygina, Wouter Buytaert, Ian Cluckie, Sarah Dunn, Uwe Ehret, John Ewen, Alexander Gelfan, Tim Hess, Denis Hughes, Bethanna Jackson, Thomas Kjeldsen, Ralf Merz, Jong-Sook Park, Enda O’Connell, Greg O’Donnell, Ludovic Oudin¹, Ezio Todini, Thorsten Wagener and Howard Wheeler

Modelling the hydrological impacts of rural land use change: current state of the science and future challenges

[McIntyre_35](#)

Neil McIntyre, Caroline Ballard, Nataliya Bulygina, Zoe Frogbrook, Ian Cluckie, Stephen Dangerfield, John Ewen, Josie Geris, Alex Henshaw, Bethanna Jackson, Miles Marshall, Tim Pagella, Jong-Sook Park, Brian Reynolds, Enda O’Connell, Greg O’Donnell, Fergus Sinclair, Imogen Solloway, Colin Thorne and Howard Wheeler

The potential for reducing flood risk through changes to rural land management: outcomes from the Flood Risk Management Research Consortium

[McIntyre_36](#)

C. Millar, I.A. Malcolm, K. Kantola, D.M. Hannah and R.J. Fryer

The influence of forest harvesting on stream temperatures

[Millar_37](#)

K.J. Millidine, I.A. Malcolm, C.N. Gibbins, R.J. Fryer and A.F. Youngson

The influence of canalisation on juvenile brown trout (*Salmo trutta*) habitat

[Millidine_38](#)

F.D. Mwale, A. J. Adeloye, R. Rustum

Infilling of missing rainfall and streamflow – a self organizing map approach

[Mwale_39](#)

A.R. Nicholson, P.F. Quinn, G.M. O’Donnell, M.E. Wilkinson and Q. Liang

Development of a modelling tool to assess the impact of storage ponds as a form of natural flood management in small catchments

[Nicholson_40](#)

M.C. Ockenden, C. Deasy, J.N. Quinton, N. Favaretto and C. Stoate
Reducing diffuse pollution in agricultural catchments: retention of sediment and nutrients in field wetlands

[Ockenden_41](#)

B.É.Ó Dochartaigh, A.M. MacDonald, N.A.L. Archer, A.R. Black, M. Bonell, C.A. Auton and J.E. Merritt
Groundwater-surface water interaction in an upland hillslope-floodplain environment, Eddleston, Scotland

[Ó Dochartaigh_42](#)

I. Pattison, D.A. Sear, P. Carling, A.L. Collins, J.I. Jones and P.S. Naden
Assessing the effect of fine sediment upon salmonid egg incubation using a modelling approach: SIDO-UK

[Pattison_43](#)

David Price
Scottish loch hydrology: improved understanding and recent methodological advancements

[Price_44](#)

Ruth Quinn and Alejandro Dussailant
Predicting pollutant retention in SUDS, with a rain garden application

[Quinn_45](#)

Harvey J.E. Rodda and Jane Hawkins
Surface water flooding in rural areas: observations, monitoring and methods for peak flow estimation

[Rodda_46](#)

P. Rodgers, O. Bramwell, L. MacMillan and A. Fionda
Assessment of rainfall–runoff modelling uncertainty and its impact on water resource yield sensitivity in Scotland

[Rodgers_47](#)

James Sample, Sarah M. Dunn, Iain Brown and Willie Towers
Scotland's water resources: impacts of land use and climate change

[Sample_48](#)

Michael Spencer
Scottish snowline observations - the past and future

[Spencer_49](#)

J. Stopps, L.J. McEwen and D.J. Milan
Fine sediment sources, sedimentation risk and siltation of salmonid spawning gravels in the Herefordshire Lugg, UK

[Stopps_50](#)

C. Isabella Tindall, Kay Heuser, Alan Jenkins, Graham J.L. Leeks and Neil R. Runnalls
The NERC Water Security Knowledge Exchange Programme – its achievements and remaining challenges

[Tindall_51](#)

K. Tota-Maharaj, P. Grabowiecki and M. Akintoye

A hydrodynamic experimental study of green roofs as an effective sustainable urban drainage system (SuDS)

[Tota-Maharaj_52](#)

K. Tota-Maharaj, P. Grabowiecki, M.A. Khan and M.B. Undre

Combined engineered wetland and water-sourced geoexchange system treating and controlling urban runoff

[Tota_Maharaj_53](#)
