

BRITISH HYDROLOGICAL SOCIETY

**SIXTH
NATIONAL
HYDROLOGY
SYMPOSIUM**

**THE UNIVERSITY OF
SALFORD**

**15-18 SEPTEMBER
1997**

CONTENTS

Session 1	<i>Hydrometry and water resources management</i>	Page
Modelling and automatic control of flow regulation for multipurpose catchment management	<i>Lees, M.J.</i>	1.1
Drought, climate change and water resources in north east England	<i>Goldsmith, H., Mawdsley, J. & Homann, S.</i>	1.13
The North West Flood Forecasting System (WRIP North West)	<i>Han, D., Cluckie, I.D., Wedgwood, O. & Pearse, I.</i>	1.23
Towards new approaches to the evaluation of hydrometric monitoring data	<i>Black, A.R., Bennett, A.M., Hanley, N.D., Nevin, C.L., Steel, M.E., Rylands, W.D. & Adams, J.R.W.</i>	1.29
A potential link between sheep overgrazing, erosion and flooding	<i>Johns, M.</i>	1.39
Session 2	<i>Water quality in upland catchments</i>	
Assessing variability of acidity in Yorkshire rivers, with special reference to acid sensitive headwaters of the Esk catchment	<i>McNish, J.H., Labadz, J.C. & Butcher, D.P.</i>	2.1
Groundwater influence on the hydrology and hydrochemistry of upland streams in Scotland	<i>Soulsby, C., Chen, M., Helliwell, R., Ferrier, R., Jenkins, A. & Harriman, R.</i>	2.9
Major-ion chemistry of streams draining the English Lake District (Cumbria)	<i>Thornton, G.J.P. & Dise, N.</i>	2.17
Developing a typology to model the fluvial transfer of coarse sediments in an upland catchment	<i>Walker, J.</i>	2.25
Session 3	<i>Water quality and water quality modelling I</i>	
Advection-dispersion modelling of contaminant transport in rivers using DISCUS	<i>Wallis, S.G. & Manson, J.R.</i>	3.1
Finite element transport modelling using preconditioned biconjugate gradient stabilised methods	<i>Sbai, M.A. & De Smedt, F.</i>	3.9
Fate and transport of organic micropollutants (PCB) in an estuarine tidal environment: application to the Scheldt estuary	<i>Mwanuzi, F. & De Smedt, F.</i>	3.17
Session 4	<i>Water quality and water quality modelling II</i>	
Integrated nitrogen dynamics in catchments (INCA) – a new process-based model for assessing semi-distributed behaviour in catchments	<i>Whitehead, P.G., Wilson, E. & Butterfield, D.</i>	4.1
Prediction of travel times and dispersion of pollutant spillages in non-tidal rivers	<i>Wilson, D.A., Butcher, D.P. & Labadz, J.C.</i>	4.13
Hydrological controls on phosphorus loss from agricultural systems	<i>Dils, R.M. & Heathwaite, A.L.</i>	4.21
Predicting the consequence of minewater pollution following closure of Polkemmet Mine, central Scotland	<i>Chen, M., Soulsby, C. & Younger, P.L.</i>	4.31
Catchment behaviour and bacteriological quality of rural water supplies, southern Zimbabwe	<i>Kirby, C.</i>	4.41
The Manchester Ship Canal: organic contamination in the sediments and implications for remediation	<i>Litton, G.S. & Hendry, K.</i>	4.49

Session 5	<i>Remote sensing: satellite observations</i>	Page
Estimating the surface water and radiation balance from space	<i>Fox, N.I., Collier, C.G. & Saich, P.</i>	5.1
Using estimates of surface sensible heat flux to evaluate the likely occurrence and magnitude of convective rainfall	<i>Collier, C.G. & Fox, N.I.</i>	5.7
Spatial resolution and variation of soil moisture as detected by ERS-1 SAR imagery	<i>Davie, T. & Kelly, R.</i>	5.11
Remote sensing of the transient snow-line to analyse the variability of runoff from glacierised basins in the Karakoram Mountains	<i>Collins, D.N. & Lowe, A.T.</i>	5.19
Session 6	<i>Remote sensing: ground-based radar observations</i>	
A look to the future of weather radar and its impact on hydrology	<i>Hardaker, P.J.</i>	6.1
Radar as a hydrological information system: a look forward towards developments in the use of conventional, reflectivity radar	<i>Archibald, E.J. & Smith, A.H.</i>	6.7
Benefits of quality control and correction of radar estimates of precipitation	<i>Harrison, D.L., Driscoll, S.J. & Hughes, P.A.</i>	6.13
Improving the accuracy and reliability of weather radar data using vertical reflectivity measurements	<i>Tilford, K.A., Griffith, R.G. & Lane, A.</i>	6.21
 <i>(Session 7 consisted of invited papers, not published in this volume)</i>		
Session 8	<i>Aspects of climate change</i>	
Everyday aspects of climate change in Europe	<i>Faulkner, D.S., Arnell, N.W. & Reynard, N.S.</i>	8.1
The nature, causes and impacts of recent hydroclimatic variability in Scotland and Northern Ireland	<i>Foster, M., Werritty, A. & Smith, K.</i>	8.9
Statistical downscaling of General Circulation Model output for climate change impact assessment	<i>Wilby, R.L.</i>	8.19
Climate change and yield assessment: a European perspective	<i>Hughes, C., Stevens, I.M. & Ball, J.</i>	8.31
Climate change impact assessment: an application to the Tyne basin	<i>Kilsby, C.G., Fallows, C.S. & O'Connell, P.E.</i>	8.39
Session 9	<i>Aspects of hydrological modelling</i>	
Estimation of summer low flows at the ungauged site	<i>Brown, M.W.H. & Owens, M.D.</i>	9.1
Spatial modelling of upland catchment yield using GIS and remote sensing	<i>Cheesman, J. & Petch, J.</i>	9.9
Conditioning parameter estimates of a distributed model using uncertain estimates of contributing area	<i>Franks, S.W., Gineste, P., Beven, K.J. & Merot, P.</i>	9.15
A fuzzy disaggregation approach to the identification and representation of variability of surface fluxes at the landscape scale	<i>Franks, S.W. & Beven, K.J.</i>	9.25
Exploring neural network rainfall-runoff modelling	<i>Abrahart, R.J. & Kneale, P.E.</i>	9.35
Living with the ultimate black box: more on artificial neural networks	<i>Minns, A.W. & Hall, M.J.</i>	9.45
